You can count on us

when it really counts.

Founded in 1982, SPI is a distributor and fabricator of mechanical and building insulation products.

Our products are used in thermal, acoustic, and fire protection applications. Across commercial, industrial, marine, and OEM markets, you will find SPI products in a range of projects.

You can count on SPI to deliver reliable product performance, exceptional customer service, and absolute best value.

SPI Global Export Capability

Exporting from:

Houston, TX

Miami, FL

Jacksonville, FL

Seattle, WA

Baltimore, MD

SPI Strengths and Stability

SPI's product lines include 35,000 SKUs in a variety of applications. Our biggest product line is insulation systems for all imaginable applications. We also make OEM products, passive fire protection systems, acoustical panels, and other specialty products.

Our broad footprint covers most of North America, with sales and service centers throughout the United States and Canada. By working with domestic and international alliances, SPI serves a diverse customer base.

Our people are our most important asset and remain the company's secret to growth and prosperity. By employing a skilled, talented workforce, SPI creates lasting relationships with our customers. We are a family, and we want each customer to feel welcome.

SPI is a leading provider of superior solutions for the insulation and architectural industries. Not only do we provide industry-best service to our customers, but we also provide innovative distribution for our vendor partners.

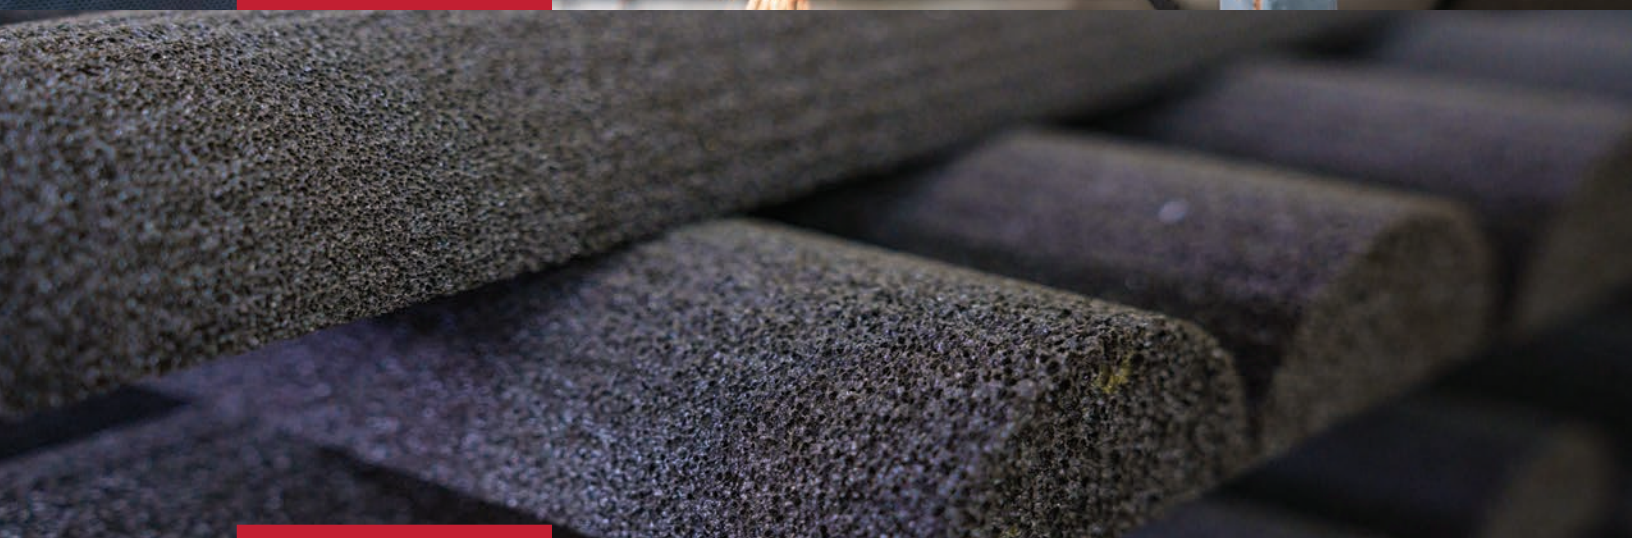

At SPI, we are dedicated to being more than just an order-taker, and our track record speaks for itself. Let's create something great together.

Safety is #1

Safety is our top priority and has been since day one. We maintain our commitment to safety with ongoing training, measurement, and communication. From loading materials at our warehouse to fabricating value-added products or delivering to the job site, keeping our people safe is our highest consideration.

SPI is a regular recipient of the National Insulation Association Theodore H. Brodie Distinguished Safety Award.

Commercial Insulation//

Mechanical and building thermal insulation, fire protection, acoustic treatments, and specialties.

Applications include:

- *Mechanical (Plumbing and HVAC) insulation systems*
- *Fire protection systems for: grease, chemical fume, clothes dryers, exhaust ducts, SafeLite® fixture covers, cable trays, conduits, and structural fireproofing*
- *Acoustic specialties, including Absorption Plus® panels, specialty composites to absorb/block sound, and more*
- *Metal building insulation (MBI)*
- *Curtain and cavity wall insulation, safing, parking garages, etc.*

Industrial Insulation//

Mechanical insulation for cryogenic to high-temperature, fire protection, refractory, and acoustic applications.

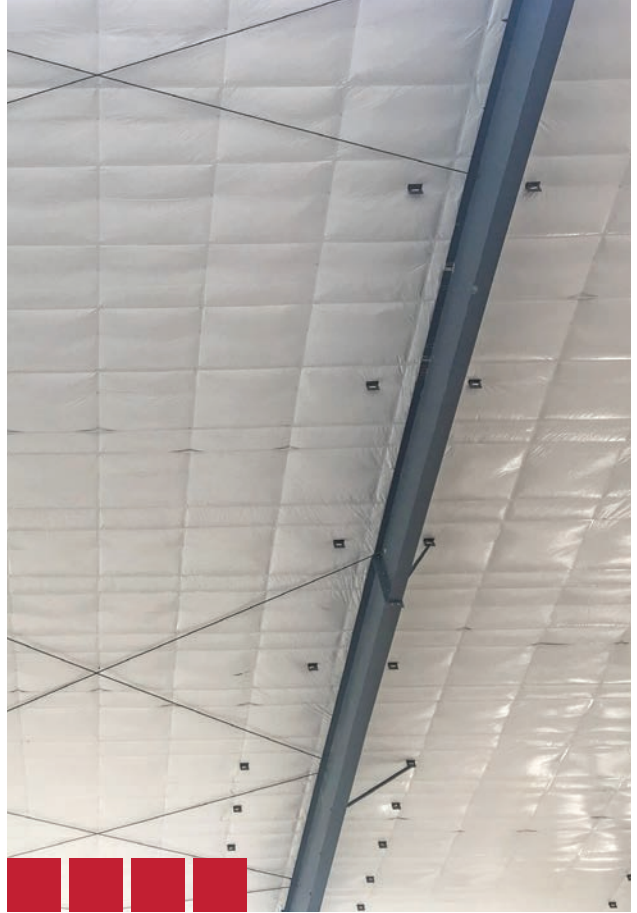

- *Process pipe, ductwork, vessel, and equipment insulation*
- *Fire protection for vessels, structure, cable raceways, conduits, and firestops*
- *Acoustic specialties to absorb and block sound for a wide range of applications*

Marine Insulation//

Products and services for commercial vessels, workboats, offshore platforms, and navy requirements.

- *Pipe, duct and tank, and equipment insulation*
- *Hull board insulation for thermal, acoustic, and fire protection*
- *Firestop systems*
- *SafeLite® ceiling recessed fixture covers*

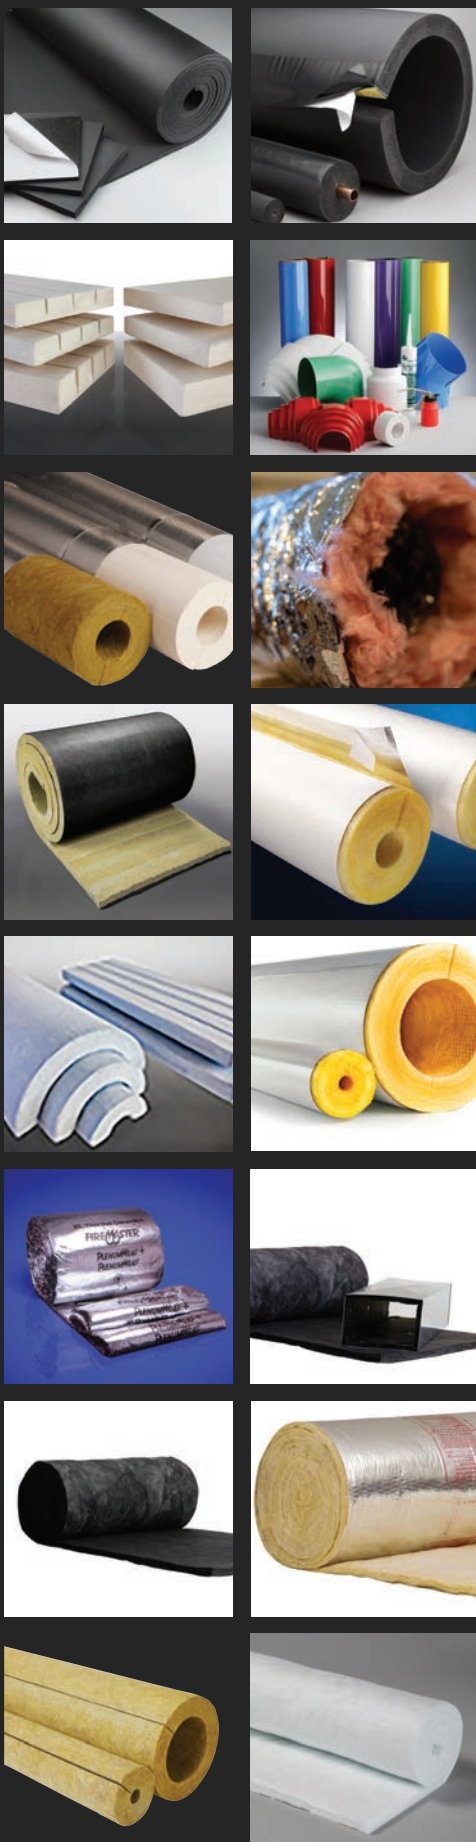

Building Insulation//

Products and services for all types of building projects and insulation concerns.

- *Metal building insulation (MBI)*
- *Acoustical insulation*
- *Fiberglass, mineral wool, foam board, and more*
- *Coatings and mastics*
- *Poly sheets and disposables*
- *Safety equipment*

SPI's insulation products are installed for: **energy conservation, condensation control, freeze protection, process control, fire safety, personnel protection, and noise control.**

Mechanical System Insulation//

We provide materials for pipe, fittings, duct, and equipment applications requiring thermal or acoustic insulation, or fire protection. Products include: fiberglass, elastomeric foam, mineral wool, extruded polystyrene, polyisocyanurate and phenolic foam, cellular glass, cal-sil, perlite, aerogel, needled e-glass, high-temperature blanket, endothermic mat, textiles, mass vinyl, and composites.

Corrosion Protection//

Coatings and wraps for pipe, duct, and equipment. Other CUI considerations include: insulation and jacketing selection, proper system installation, and the need for regular system inspection and maintenance.

Fabricated Products and Services

SPI partners with industry-leading manufacturers of proven and leading-edge technology products to provide best-in-class, value-add fabricated products to our customers. Products are marketed under SPI's brand and private-label agreements.

Benefits of SPI Fabrication Services

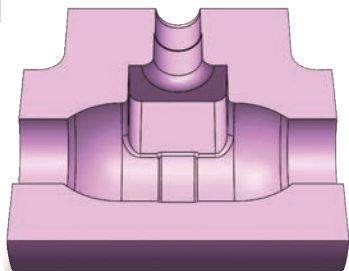

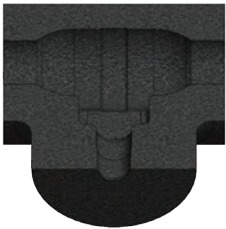

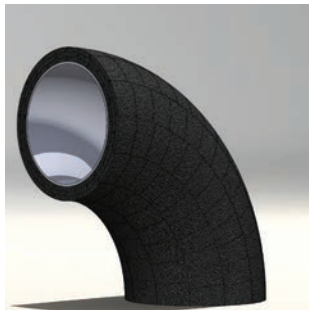

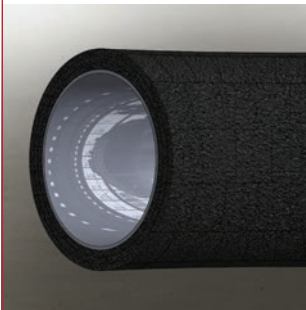

- *Provide fixed vs. variable cost*
- *Reduce labor cost and personnel demands*
- *Reduce job site injuries and claims*
- *Reduce site storage damage, waste, and disposal fees*
- *Increase site production*
- *Yield a consistent, high-quality product with an experienced team performing work in a controlled environment using refined processes and procedures*
- *Leverages available site labor, optimizing for other tasks*
- *Provide finished goods with shorter lead times using regional fab shops*
- *Access readily available raw material, including billets, buns, cores, board, batt, blankets, jackets, and facing laminations*
- *Deliver fabricated products when and where needed with SPI's network*

Fab Quality

We fabricate mechanical insulation products to applicable ASTM standards.

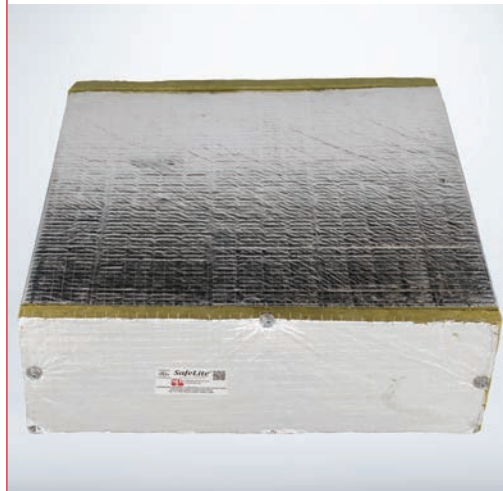

We also test applicable fabricated products to ASTM standards at accredited laboratories for code, specification, and standard compliance.

Laboratory-Certified Products

SPI produces lab-certified products under follow-up services with UL, Intertek labs, and the US Coast Guard. This experience and documented process control provides added assurance that you can depend on the quality of SPI's fabricated products.

Intertek

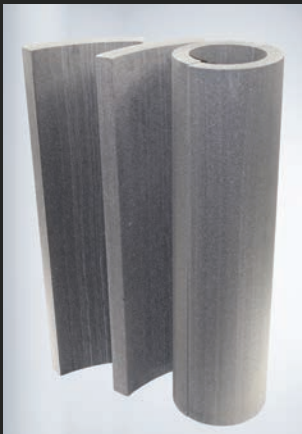

Fabricated Pipe, Duct, and Equipment Insulation

Metal building insulation, or MBI, is used to insulate industrial buildings. It helps to stabilize a building's temperature, absorb sound, and protect against moisture. MBI comes in a variety of forms, but the most-used types are rigid fiberglass systems, blankets, fabric liner systems, and more. Different types are suitable for different projects, and SPI portfolio company Therm-All is proud to carry them all.

Fabricated Pipe Jacketing Materials

We provide a complete range of jacketing and cladding materials, including: metal and plastic (roll or sheet and formed), PVC, PVDC film, Proline Plus™ jacketing, laminates, fabric, mastics, coatings and adhesives, GRP, and FRP (glass and fiber reinforced plastic).

Jacketing/cladding materials protect the insulation system and also serve as a weather barrier, vapor retarder, condensation barrier, and abuse protection, in addition to enhancing the system appearance.

Fabricated Pipe Supports

We provide custom pipe supports to meet specific application conditions in a variety of insulation materials, densities, and thicknesses. We supply jacketing with matching saddles to optimize system performance and longevity.

Fabricated Tank and Vessel HATS®

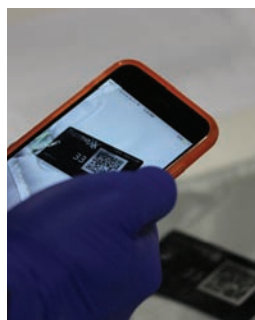

We provide superior vessel head insulation systems that are especially critical for cryogenic applications. Our precision-machined HATS® improve process operating efficiencies, reduce life cycle operating and maintenance costs, and provide dramatic installation labor savings. We also supply machine-curved sidewall segments and companion cladding, providing superior tank insulation systems.

ThermaXX specializes in designing and manufacturing best-in-class removable insulation solutions to meet even the most unique or complex needs. ThermaXX insulation jackets are handmade in West Haven, CT with quality materials by expert technicians using ISO 9001:2015 certified processes to ensure product performance and durability. Many of our engineers and designers have cross-disciplinary experience that allows for more effective design and production.

Our production floor is equipped with state-of-the-art machinery and a team of highly trained production experts who pay close attention to detail every step of the way – from the cutting room, to sewing, to shipping and installation. We leverage technology throughout the fabrication process, tracking individual assets from design through installation and maintenance, using unique QR codes on our Slate™ Smart Tags. Quality is integral to ThermaXX and affects everything we do. We will meet or exceed our customers' expectations, providing an industry-leading 5-year warranty on all products.

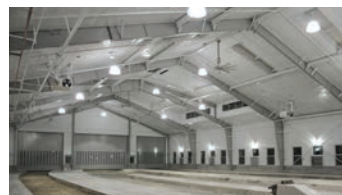

Therm-All has been at the forefront of innovative metal building insulation solutions since 1981. We were the first to spearhead important industry standards, such as third-party testing of after-laminated R-values. In fact, it was our former President, Bob Smigel, who pushed for certification to guarantee to builders that the faced insulation product they received from any company would be 100% of the advertised R-value.

Today, Therm-All customers can count on products designed to meet all the current standards and certifications, including NAIMA 202-96, NIA Certified Faced Insulation, Home Innovation Research Labs Verification, UL 25-50, and several environmental standards, such as LEED and GREENGUARD. We offer a full line of custom fiberglass and rigid insulation systems, reflective insulation, door and window systems, vapor retarders, OSHA-compliant safety systems, metal building accessories, insulation retrofit, and more.

We are also the #1 commercial energy code resource in the metal building industry. As a continuing education

provider with the American Institute of Architects (AIA), we help architects, engineers and builders stay at the top of their field through a variety of learning opportunities each year.

We are a trusted partner of Owens Corning and the AIA, and we are a proud member of NIA, MBMA, and MBCEA. With 11 facilities nationwide, we are strategically positioned to deliver across the U.S. and much of Canada.

Pamrod HATS® Installation

(provides substantial labor savings)

Pamrod HATS® are prefabricated and shipped ready to install, therefore, the need for field cutting is virtually eliminated. Pamrod HATS® are available in the following materials: expanded perlite, polyisocyanurate, polystyrene, cellular glass, and phenolic foam.

Tank and Vessel Curved Sidewall Segments

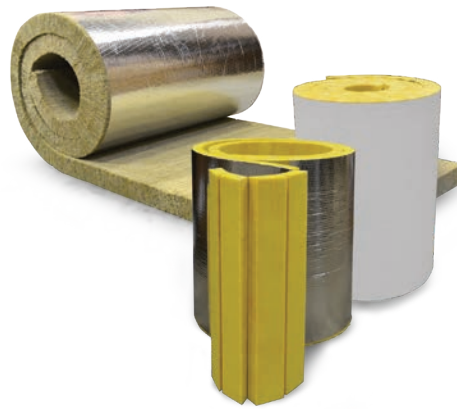

We provide precision machine-curved insulation segments in a range of materials, including cellular glass, polyisocyanurate and extruded polystyrene foam, perlite, cal-sil, and more. Segments can be supplied with square or precision-beveled edges for optimal installation and thermal efficiency.

RigidFlex® Pipe and Tank Wrap

Made with leading manufacturer insulation materials laminated to industry-standard FSK, ASJ, and other facings. The finished roll material is used on large-diameter pipe, tanks, and vessels in lieu of preformed pipe and machine-curved segmental insulation.

This reduces the typically long lead times associated with large-diameter preformed pipe insulation. Supplied in fiberglass and mineral wool insulation at densities and thicknesses to meet operating temperature requirements and conditions.

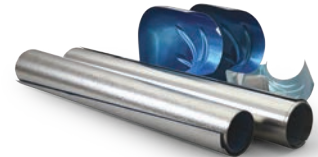

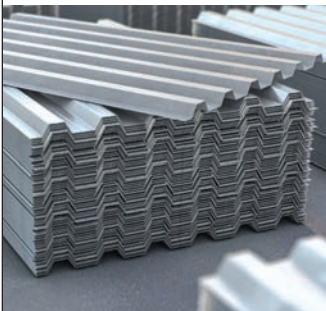

SPI Fabrication Shops

We produce a variety of products to satisfy project specification requirements.

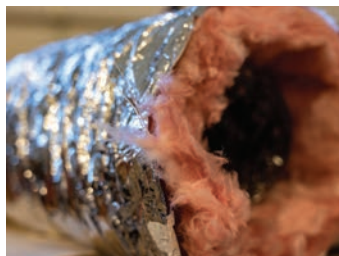

Jacketing and Cladding Materials

We supply aluminum, stainless steel, and galvanized steel in roll, sheet stamped profiles, and banding in the grade and gauge required by the project. We fabricate fitting covers and vessel jacketing in painted and corrosion-inhibiting aluminum (both smooth and embossed) and stainless steel. We provide metal lath, mesh, and cut and curled PVC pipe and fitting covers along with labels for easy system identification.

Fire Protection Products

We provide systems from leading manufacturers of firestop systems for penetrations and joints and rated enclosures for: kitchen exhaust, clothes dryers/fume exhaust ducts, return air plenum protection systems, curtain wall systems, patented SafeLite® fixture covers, cable raceways and conduits, structural steel, and vessel fire protection. Systems are evaluated to ASTM or UL fire standards. The range of products include elastomeric sealants, spray coatings, intumescent caulks, putty, pillows and devices, fire resistant block, board, blanket, batt, mat, and fire-resistant coatings to treat wood and other combustibles.

Acoustical Products and Services

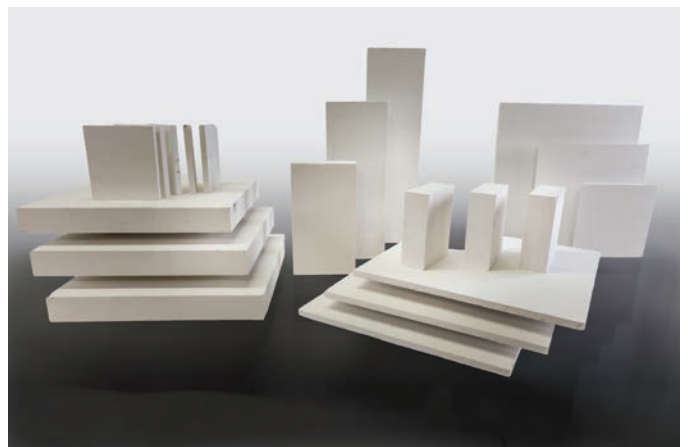

We provide and custom-fabricate sound absorbing and blocking materials, as well as specialty composites using materials from leading manufacturers. Products provide solutions to address acoustic concerns for mechanical systems, building, marine, and OEM applications. Our range includes:

- Absorption Plus® acoustic wall, cloud/deck, impact/tack, imagine (digital imaged), baffle, and tack panels and diffusers
- Composite absorber and barrier products
- SafeLite® sound-blocking ceiling fixture covers
- Mass vinyl sound barrier
- Acoustic fiberglass and mineral wool
- Acoustic foam materials
- Sound sealant and putty pads
- PG Board TAF™ when used in conjunction with the optional microperforated facing

Refractory Products

Materials from leading manufacturers support application temperatures in excess of 3000°F. Products include bulk, blanket, board, V/F shapes, paper, felt, modules, dense and insulating firebrick, monolithics (castable, gunite, and ramming mix), structural block, wet products (felt, moldable, mastics, coatings, and cement), textiles, rope, gasket, thread, and hardware. We provide custom slitting, cut to size, machined shapes, specialty laminations, and composites to serve industrial, marine, and OEM applications.

Building Insulation

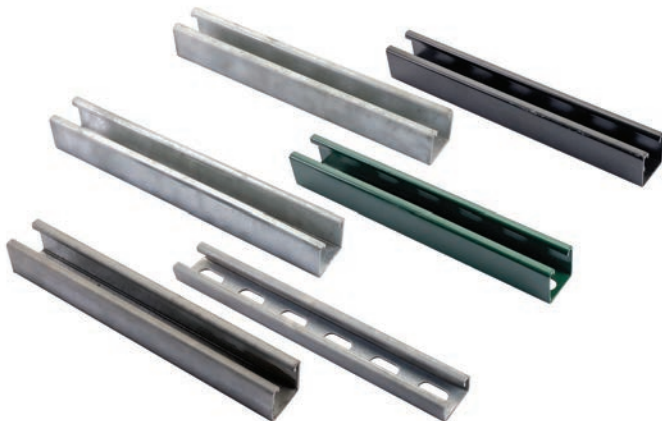

We provide building insulation products from leading manufacturers, including fiberglass loose fill, blankets, and batts; mineral wool; foam board; spray foam; insulation; coatings and mastics; and other products for metal buildings, industrial buildings, municipal buildings, and other applications.

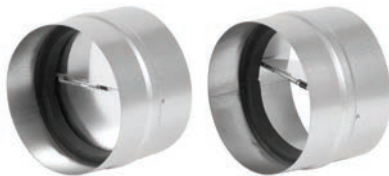

HVAC System Components

We provide spiral and snap lock pipe, stamped fittings (90s, 45s, couplings, and reducers), high-efficiency take-offs, air tight and bell-mouth collars, Ts, endcaps, reducers, saddle taps, B-vent, 4-bolt flange systems (J and H), TDC/TDF component corners, cleat, slips and drive, turning vane and rail, flexible connector, damper hardware (dials, quadrants, end bearings, stand-offs, and square rod), strut and threaded rod, weld pins, screws, wire rope hanging systems, sealant, caulk and adhesive, access doors, and duct protection film. For insulating these projects, we provide duct liner, board, wrap, and flex duct.

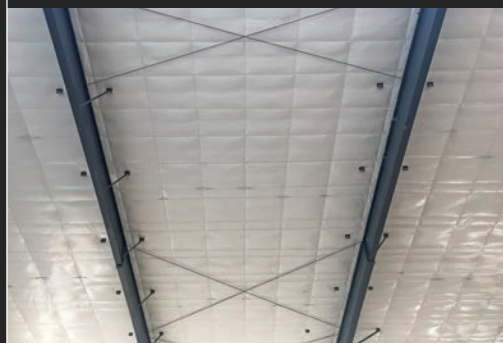

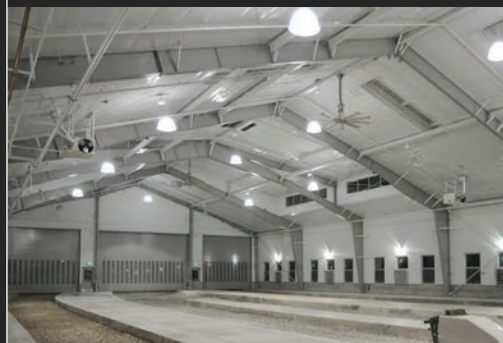

Specialty Lamination Services

We provide a wide range of lamination services for commercial, industrial, marine, and OEM applications. Most commercial and marine products are tested by accredited laboratories. Typical applications include deck and wall insulation systems for metal buildings, parking garages, mechanical and electrical rooms, theaters, restaurants, performance space, etc.

Metal Building Insulation

Our MBI is fiberglass-laminated with a variety of facing materials to provide durable, energy-efficient insulation systems to satisfy project and code requirements for pre-engineered steel and post frame metal-clad building systems.

PG Board TAF™

PG Board TAF™ is designed for parking garages and other applications to satisfy code requirements for insulation and fire exposure requirements where adjacent space is conditioned.

A semirigid, non-combustible, high-temperature insulation finished with a bright white, reinforced facing, PG Board TAF™ reduces heating, cooling, and lighting costs.

Marine Products

We provide a complete range of US Coast Guard and IMO-certified products. These include pipe, duct, tank, and equipment insulation, hull board, and marine blanket. We provide all typical hull board requirements, including thermal, acoustical, and fire protection. From pleasure craft to workboats to military vessels and offshore platforms, we service it all.

- Pipe, duct, tank, and equipment insulation
- Hull, bulkhead, and deck insulation
- Sound absorber and blocking composites
- Recessed ceiling fixture covers with patented SafeLite®
- Firestop systems
- Removable pad component materials and accessories
- Adhesives, mastics, and coatings
- Tape, mesh, and fasteners

In our world, **you are priority.**

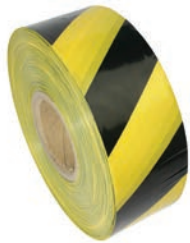

Need help with a demanding project? SPI's experienced team can assist with:

- Specification conformance review
- Product and application review
- Project priority planning and scheduling
- Bill of material review
- Submittal documentation
- Logistics coordination
- Order assembly, consolidation, packaging, and specialty labeling
- Data interface for accurate, timely material management
- Material requirements review for potential value-added fabrication for site labor savings

Safety Supplies

SPI provides a complete range of personnel protective equipment from industry-leading manufacturers so you can work safely.

Tools and Equipment

We provide industry-related hand, power tools, and equipment to safely and efficiently complete product installation and finishing.
