

Building Envelope (Curtain and Cavity Wall) Products & Value Add Services

SPI – Specialty Products & Insulation

- Leading value-add **Distributor and Specialty Fabricator** of insulation materials and related products, providing industry best service to our customers and suppliers
- Supplying Mechanical and Building Insulations and value add services for Thermal, Acoustic and fire Protection requirements.
- North American operations include 54 distribution and 13 co-located specialty fabrication facilities
- Industry Reputation for Quality, Innovation and Service

The screenshot shows the SPI website with a black header containing the SPI logo and navigation links for Locations, Contact Us, and a Search bar. A yellow navigation bar below the header lists: Home, About SPI, Products & Services, Credit & Tax, Sustainability, Careers, and MSDS. The main content area is divided into several sections: 'Locations' with a map of North America; 'The Value of Insulation' with a video player; 'Request for Quote' with links to add items, submit, and view current bill of material; 'Products & Services' with sub-sections for Commercial & Industrial Insulation, Fabrication, GSD, Fire Protection, Acoustical, and Marine; 'Featured Product' with a photo of a parking garage and text about PG Board TAF Insulation; and 'For Parking Garage & Mechanical Room Applications' with a bulleted list of benefits and a link to learn more.

We're updating! Pardon our mess, our literature is being rebranded with the SPI Logo and name, however the same trusted, quality materials and products remain.

Products & Services

Commercial & Industrial Insulation
We represent the leading manufacturers of commercial, industrial, HVAC, building and metal building insulation products.

Fabrication
If you need it, we can fabricate it! Let our network of distribution and fabrication centers customize a solution for you.

GSD
We offer great depth and diversity in architectural, ceilings and wall systems, commercial building insulation and specialty products.

Fire Protection
Our specialization in passive fire protection provides the latest in cost effective solutions from industry leading manufacturers.

Acoustical
SPI is a distributor and fabricator of acoustical products and systems. We provide acoustical solutions for a broad range of Commercial, Industrial, Multifamily, Marine and OEM markets. Our fabricated products, capabilities and qualification testing allow us to offer customized solutions to meet specific application requirements.

Refractory
Supplying products to industries such as: Power, Petrochemical, Iron & Steel, Aluminum, Ceramic, Pulp & Paper and Incineration.

Marine
We offer Coast Guard / IMO approved hull board, pipe, duct and tank

Featured Product

New PG Board TAF Insulation!

For Parking Garage & Mechanical Room Applications

- Outstanding Thermal Insulation for Code Compliance
- Improves Space Acoustics
- Composite, Class A Fire Exposure Rating for Code compliance
- Bright White Finish Provides 85% Reflectivity
- Quick and Easy to Install
- Reduces Heating, Cooling and Lighting Costs!

The Importance Of Proper Curtain Wall Protection

*Imagine being trapped
on an upper floor*

First Interstate Bank
Los Angeles, CA

Dubai "Torch Tower"

London Grenfell Tower

Properly Installed System Components

*A properly designed & tested
Perimeter Fire Barrier System
not only protects the perimeter
joint but critical wall framing and
support elements as well!*

Curtain Wall Assembly Fire Test

Intermediate Scale Multi Story Fire Test, per NFPA 285

Aluminum melts away, steel framing and curtain wall insulation left intact

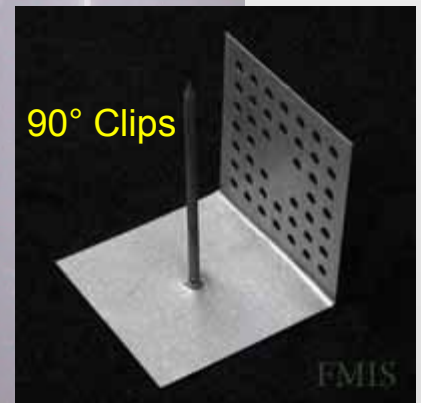

Interior View – After Fire Test

Joint system intact
after the test

Galvanized Steel Angles for Spandrel Insulation Attachment

Alternate Impasse hangers or 90° Insulation clips

We also offer panels w/ Hangers installed

Typical T Bar Stiffener at Center Slab

Unacceptable Safing Packing

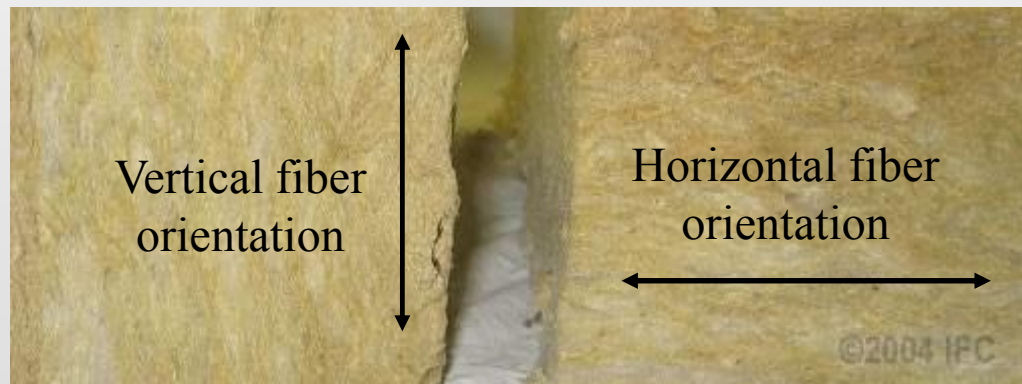

(Tightly pack correct density, thickness, with correct fiber orientation)

Loose, light density batt, not acceptable.

Perimeter Fire Containment Insulation System

- 1. Mechanically Attached Curtain Wall Insulation**
- 2. Protect Aluminum Mullions**
- 3. Compression-Fit Safing Insulation w/ Safing Clips** (per tested assembly details)

4lb. Safing Installed w/ Vertical Fiber Orientation

Cup Head CD Pins

Curtain wall insulation fastened to steel angle
Project R Value drive insulation thickness (2-6" Typical)

Safing Insulation Matches As Tested Thickness, Density & Orientation

Mullion Covers Fastened with Spiral Anchors

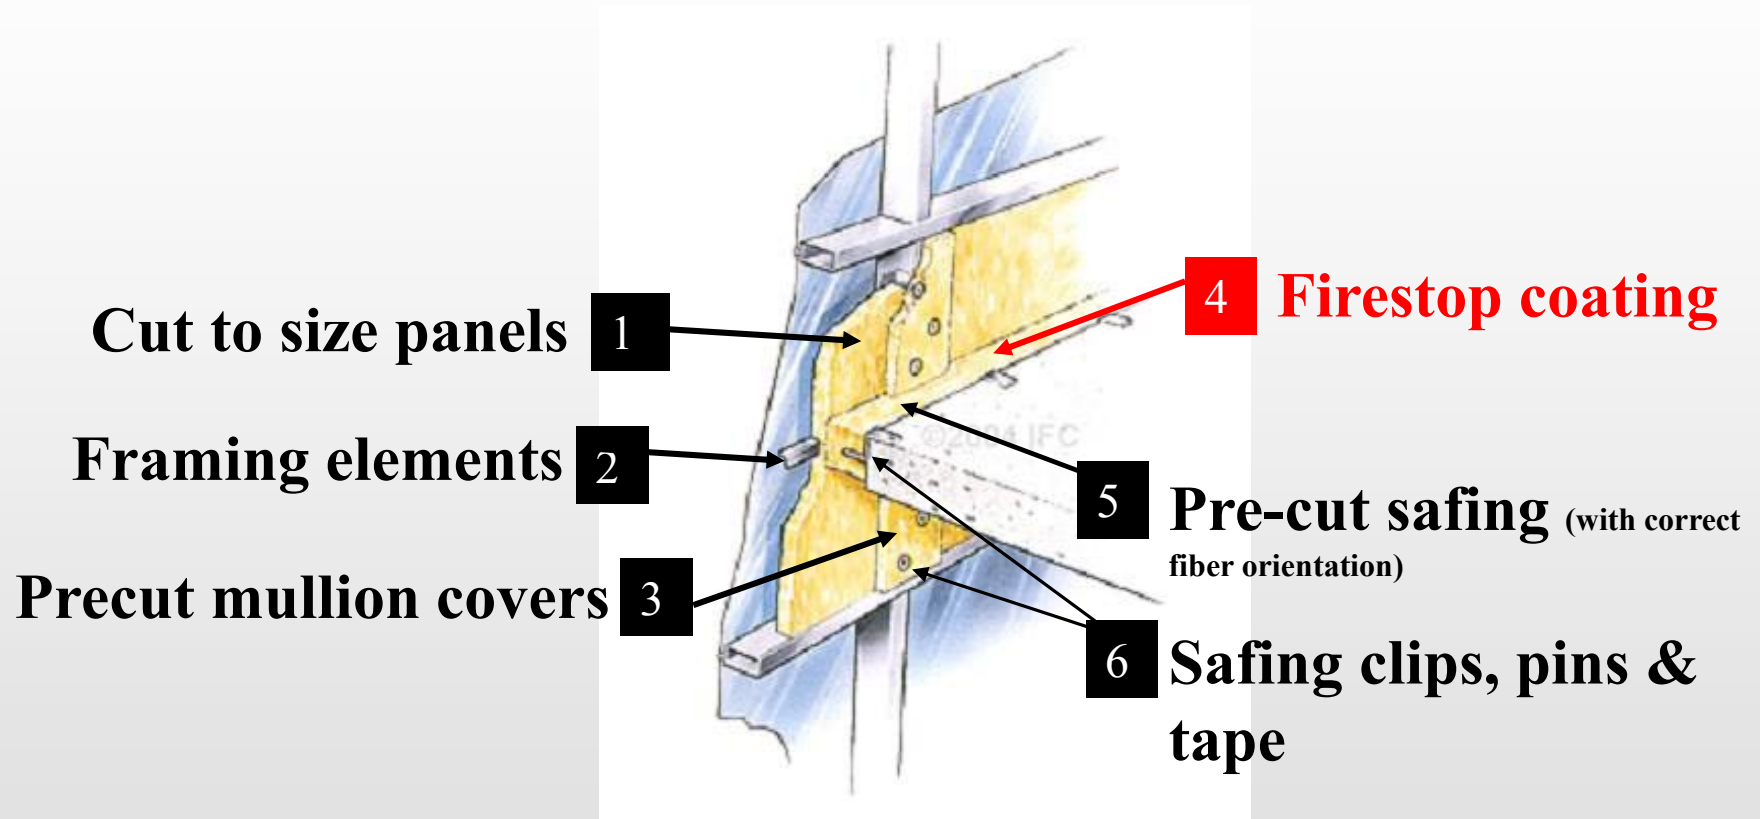

Curtain Wall System With Mullions Protected

Joints taped to maintain system vapor barrier
Firestop spray completes the system

SPI Supplied Curtain Wall Products & Fabrication Service

Supplied When and Where you Need it!

Firestop Coatings and Spray Equipment for Slab Edge Joints

Shop Installed "Cut to Size" Insulation Components

- Reduced: material handling, storage space, damage, labor cost, clean up, disposal fees and environment dust

Field Installed “Cut to Size” Curtain Wall Insulation System

Reduces material handling, storage space, damage, labor time / cost, clean up and disposal fees

Curtain Wall Insulation / Safing Service Case History

Project: GlaxoSmithKline, Five Crescent Dr., Philadelphia
Navy Yard Corporate Center, Philadelphia, PA
Project Architect: Robert A M Stern Architects
General Contractor: L. F. Driscoll Company
Installing Contractor: Pyro-Stop, LLC

Project Detail: Four story 205,000 square foot steel structure with a glass curtain wall exterior, designed to achieve LEED Platinum certification, the highest designation in the sustainable building rating system.

Scott Rankin, Pyro-Stop President, reports Pyro-Stop was awarded the project because of our reputation for expert craftsmanship and ability to complete difficult projects ahead of schedule. The project schedule was very aggressive and made more difficult due to sequencing of other trades. “SPI’s panel service minimized waste, reduced handling and job site cleanup as well as site material distribution time improving overall production.” Our customer was extremely pleased with the installation strategy and workmanship.

Pyro-Stop awarded the material contract to SPI due to their specialty fabrication services for thermal, acoustical and fire protection materials and quick turnaround capability. SPI provided panels cut-to-size per curtain wall openings to meet an aggressive delivery schedule while satisfying Pyro-Stop’s insulation budget. Exterior curtain wall panel sizes were typically five feet wide by seven feet high. The project required five inch thick insulation panels composed of eight pound density mineral fiber which would weigh over 115 pounds each. Having panels supplied pre-cut, in manageable sections made the installation easier.

Pyro-Stop Project Manager, Jim Andorko reports “We’ll use SPI’s Curtain wall, Safing, FirePlug® and FireStrip® insulation fabrication service on future projects. The cut-to-size and conveniently packaged materials resulted in decreased set up time and substantial productivity improvement.” We also believe SPI’s fabrication services will facilitate project schedule improvements, helping us secure additional work.

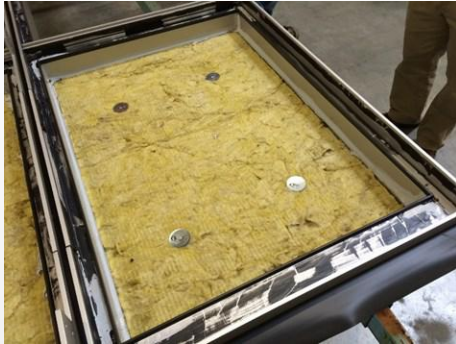

Capability – Stock Sizes, Value Add Cut to Size Panels

Mineral Wool Insulated Steel Back Pans External, Extruded Polystyrene Foam Insulated Wall Light Troffers

Steel Back Pan

Cut to size w/routed grooves

Tysons Corner, VA

Curtain Wall Acoustic Performance

- International Green Construction Code (Proximity to noise)
 - 1000 feet from expressway
 - 2 miles from airport
 - Average day level is 65 dB
 - Requires O.I.T.C. of 40
- OITC Rated Curtain Wall Assembly (best practice)
 - Thermal break framing
 - Heavier glass
 - Optimized spandrel size
 - Framing insulation inserts
 - Addressed panel joint seals
 - Increased spandrel insulation thickness
 - Include composite mass vinyl barrier with insulation

Pre-Fab Service Adds Value (reduce injuries and claims)

- Labor shortage / skilled labor jobs are hard to fill
 - The first six months of employment are most risky for injuries to new tradespeople
 - **Increased insurance claims**
 - Shortage of experienced trade workers has led to increased on-the-job injuries and construction defects
- (Refs., Manpower Group, Liberty Mutual Construction Practice)

Custom Project Materials When & Where Needed

■ **Risk Management**

- Fixed vs. Variable Cost
- Reduces Direct Labor
- Reduces Material Usage – Waste
- Reduces Material Inventory Dollars
- Reduces Storage, Material Damage and Delivery Charges
- **Safety**, Risk Management – Reduced Injury, Accidents, Claims and Insurance Costs

Adding “Measurable” VALUE !

Cavity Wall Insulation (stock and cut to size panels)

Typical Customers

- CW Fabricators and Erectors
- Glazing companies
- Thermal Insulators
- Drywall Contractors
- Firestop Contractors
- GC's that self perform

Fire Protection Products

A distributor and fabricator specializing in passive fire protection products, Specialty Products and Insulation offers fire rated solutions for a broad range of applications. Our specialization in passive fire protection provides you with the latest cost effective solutions from industry leading manufacturers. Together with our fabricated products and diverse fabrication capabilities we provide superior solutions that save time and money!

- [Structural fire proofing](#)
- [Fire retardant coatings](#)
- [Access doors and roof hatches](#)
- [Tools and equipment](#)

Fire Protection Services:

SPI provides the following services in conjunction with partner manufacturers.

- Training programs for contractors, facility maintenance, architects, engineers, building inspectors, code officials and insurance industry representatives
- Submittal assistance
- Secure engineering judgments for unusual conditions
- Product comparison and equivalency evaluation
- Job site support

SPI is a member of the International Code Council, National Fire Protection Association and Firestop Contractor International Association

Curtain and Cavity Wall Products and Services

- Supplying "cut to size" panels, shapes, and more for major labor savings
- Delivered when you need it
- Composite acoustical systems include: Mass loaded vinyl for increased O.I.T.C.
- Specialty facing laminations
- UL Certified Firestop systems
- System fasteners (pre-installed), safing clips and tapes
- Related framing components: angle, hat channel, T bar, etc.
- Firestop spray pumps, pin welders and related tools
- Personnel protective equipment
