Presenters

Specialty Products & Insulation Co.

Dave Latanision: For over 20 years, Dave has been involved in many phases of the fire protection industry. He has been a presenter for numerous building code officials, state fire marshal, architectural / engineering, and trade association conferences. He has also conducted educational programs for the Nuclear Regulatory Commission (NRC), American Nuclear Insurers (ANI) and Factory Mutual (FM) groups. His experience involves multi-family wood frame, commercial and industrial construction markets as well as a variety of industrial plants, fossil and nuclear power stations. He was previously Manager of fire protection products for Thermal Ceramics, and the manufacturer of FireMaster products.

Armstrong World Industries

Jeff Smith is an Installation and Recycling Specialist for Armstrong. He has been a card carrying carpenter for 17 years, Estimator for 13 years and Grid Specialist for 8 years. For the past 5 years he has been in charge of the growth of drywall grid products in the Northeast and for 2 years product Installation Specialist for the Northeast.

Dave Rice: Dave is an Installation and Recycling Specialist for Armstrong. He has 9 years experience as project estimator and 6 years as a grid specialist.

About SPI

To locate a service center near you or to learn more about SPI please visit www.spi-co.com.

- Nelson Firestop and Armstrong World Industries are registered providers for the American Institute of Architects Continuing Education System. Specialty Products & Insulation Co. is approved with The PA Department of Labor and Industry and the fire protection seminar qualifies for 3 hours of continuing education credits.

Why Attend the Fire Protection Seminar?

Unprotected openings, poorly sealed penetrations and construction joints provide easy paths for heat, smoke and toxic gases. These potential killers can be stopped with proper selection and installation of firestop systems. In many instances, the critical life safety firestop systems that are required by code, designed and tested to protect both the occupants and buildings, are overlooked, neglected or improperly installed. **In support of the state wide building code, Nelson Firestop and Specialty Products & Insulation Co. will present an educational fire protection seminar at no charge.**

Learn How to:

Save Lives and Property by installing the right firestop material system correctly. You'll allow occupants more time to evacuate, thus reducing their risk of injury or death, and you'll reduce property damage-claims and costly business interruptions.

Save Money by using the most cost effective, up-to-date fire materials and design solutions.

Save Your Business by reducing potential liability exposure to your business and employees.

Why Attend the Building Products Installation Training?

Increase productivity/ reduce labor cost!

- **Drywall Grid Systems**—Installation demonstration using grid components to quickly fabricate soffits, drops, vaulted ceilings & more.
- **Axiom Building Perimeters**—Installation demonstration of window pocket details with HVAC system integration.
- **Cloud Formations**—Demonstration using available pre packaged easy to install kits to improve acoustics or add visual accents.
